Call for Science of Science Summer School Micro-Grants 2022

We are pleased to announce the S4 Micro-Grants to recognize and support your research. These micro-grants are funded by the NSF's grant #1933803, "Collaborative Research: Social Dynamics of Knowledge Transfer Through Scientific Mentorship and Publication," and the Science of Science and Computational Discovery Lab from the School of Information Studies at Syracuse University.

Awards will be given to outstanding proposals of students who attended the Science of Science Summer School and submitted a project proposal. A student can only participate in one micro-grant. Your project must select a project leader who will receive the funding. The project leader must be currently enrolled or a researcher in research-based doctoral degree programs at accredited US institutions. A maximum of 10 (ten) awards of $1,000 is expected to be given. The project should last only for the 2022–2023 academic year. The award will be given as "participant support" and therefore should not incur overhead costs by your institution.

Eligibility

To be eligible to apply for the micro-grant, the project leader must:

1. Be enrolled in a doctoral program or work as a researcher (postdoctoral researcher or assistant professor) in a research-based accredited United States graduate institution;
2. Reside in the US at the time of the award;
3. Agree to submit a final report of the uses of the micro-grant by the end of 2022-2023 academic year;

Application process

The application will be a single document of at most two pages (including references) detailing:

1. Indicate the project members' affiliations and contact information.
2. Indicate the designed project leader
3. Title and abstract of the project
4. A sentence attesting to the eligibility of the project leader to receive the funds
5. A project description
6. Proposed project time frame
7. Rough budget of how the funds will be used (a couple of sentences)

Applications will be reviewed based on fit to broad Science of Science tropic, intellectual merit, broader impact, and the likelihood of finishing within the academic year.

The deadline to receive your application is August 30, 2022, AoE. Awardees will be announced in early September 2022.

Send your application to both Daniel Acuna (deacuna@syr.edu) and Stephen David (davids@ohsu.edu).
